

November 7, 2008

To whom it may concern:

This is to draw to your attention to the excellent qualities of Mr. Taro Maruyama, who was a participant in my applied electrochemistry seminar in 2008.

As his personal history makes it clear, Mr Maruyama has had an extensive experience in the area of applied electronics. In my seminar on the subject, he stood out conspicuously for his knowledge and a high order of intelligence. I believe that a researcher like him is a rare gem.

Among a group of highly proficient technicians and researchers, his solid scholarship, adaptability and ease were far superior to those of the other participants. His keen, well-disciplined mind, and diligence earned him the respect of everyone.

I understand that his now seeking employment. He is sharp and quick to express his opinion with courage and determination, and I think that wherever he works he will be a great asset to the company and his fellow employees.

Should any other information be required, please do not hesitate to contact me.

Sincerely yours,

(Signature)
